

Statement of Work for Canberra ECAM Annual Calibration & Maintenance Services

1. Perform annual calibration service on 30 ECAMs.
2. Provide annual preventative maintenance inspections on 30 Environmental Continuous Air Monitors (ECAMs).
3. Test ECAM's and identify any non-functioning component parts.
4. Provide recommendations regarding a course of corrective action.
5. Preventative maintenance trip not to exceed five working days.
6. NASA will establish a replacement part fund of \$10,000 on this PR for the service provider to charge against should it be necessary to replace any malfunctioning parts identified as a result of performing preventative maintenance on the ECAMs.
